SUMMARY

Experienced **Senior Frontend Engineer** specializing in **frontend** development with a focus on **React since 2019 (7 years)**. Skilled in building scalable and robust web applications using **TypeScript** and the **React ecosystem**, including **Next.js (since 2022)** and **TanStack Start**, across client-rendered, **SSR**, and **ISR** architectures. Work covers **design systems**, **Core Web Vitals**, and the full delivery cycle: planning, architecture, implementation, testing, monitoring, and production support.

SKILLS

Proficient: React, Next.js, TanStack Start, TanStack Router, TypeScript, JavaScript, Vite, Tailwind CSS, shadcn/ui, HTML, CSS, SCSS, Vitest, Docker, Cursor, Zustand

Intermediate: Bun, Fastify, Prisma, Drizzle, PostgreSQL, SQLite, PHP, MySQL, CI/CD, Figma, Adobe XD, Photoshop, Claude, MobX, Aphrodite, Node.js

Beginner: Azure, AWS, Cloudflare, Gulp

PROFESSIONAL EXPERIENCE

Leanwork | Londrina, Brazil | Remote
Jul 2018 to Present

Senior Frontend Engineer | Client: Rheon Sep 2025 to Present

- Cut Azure build time by 83% (from 6 minutes to 1 minute) by rebuilding the multi-tenant marketplace on TanStack Start. The Next.js app stayed live while the new application was introduced.
- Put the TanStack Start app under Vitest with 800+ tests, covering about 78% of the lines.
- Kept the legacy Next.js storefront and the new TanStack Start app in production together while pharmacies onboarded, using Cursor to implement changes and reviewing each one before merge.

Key technologies and tools: React, Next.js, TanStack Start, TanStack Router, TypeScript, Vite, Tailwind CSS, shadcn/ui, CI/CD, Vitest, Cursor, Figma, Claude, Zustand

Tech Lead Frontend | Client: Sinerlog Jan 2025 to Aug 2025

- Led a team of 3 frontend engineers in the simultaneous delivery of four admin applications and one multi-tenant e-commerce platform using React, Next.js, Vite, and TypeScript.
- Worked closely with the client through recurring alignment meetings, translating business requirements into technical scope, priorities, and frontend delivery plans.
- Designed a shared UI registry inspired by shadcn/ui, standardizing reusable components across applications and reducing duplicated implementations.
- Helped structure separate HML and production delivery pipelines so each environment could be deployed independently.

Key technologies and tools: React, Next.js, TanStack Router, Vite, TypeScript, shadcn/ui, Tailwind CSS, Docker, CI/CD, Figma, Zustand

Senior Frontend Engineer | Client: FarmaciasApp Jan 2023 to Dec 2024

- Improved catalog and product templates on a Next.js pharmacy marketplace by memoizing components, caching data, and serving images with next/image, then validating improvements in Chrome Lighthouse.
- Made product pages easier to index and share with JSON-LD and Open Graph, tracked storefront events with Google Tag Manager, and used SSR and ISR for rendering.

Key technologies and tools: React, Next.js, TypeScript, Tailwind CSS, SEO, Lighthouse, Adobe XD, Keycloak

Frontend Engineer | Client: Riachuelo (Fanlab, Carter's) Jan 2021 to Dec 2022

- Built and maintained the Fanlab and Carter's storefronts with React, Next.js, and TypeScript, shipping features on large teams.
- Improved app cold start by adding a YAML reader for environment configuration, allowing the team to load environment values at startup instead of setting variables manually.

Key technologies and tools: React, Next.js, TypeScript, SCSS

Frontend Engineer | Client: Centauro Jan 2019 to Dec 2020

- Built a product page where customers customized t-shirts on an HTML canvas with fabric.js.
- Moved in-store t-shirt customization to React and Electron totems, and migrated that UI from class components to functions.

Key technologies and tools: React, MobX, Aphrodite, PropTypes

Junior Frontend Engineer Jul 2018 to Dec 2018

- Styled and fixed legacy storefronts using HTML, CSS, JavaScript, and jQuery, and built an Angular app for courses, exams, and students.

Key technologies and tools: HTML, CSS, JavaScript, jQuery, Photoshop, Angular, Webpack, Gulp

Elitesoft Informática | Londrina, Brazil

Jan 2017 to Jun 2018

Junior Software Engineer Jan 2017 to Jun 2018

- Moved the ISP ERP UI from Qooxdoo to Angular and cut maintenance time by about 40%, working across PHP, MySQL, and Angular.
- Automated weekly support tasks that clients were doing by hand.

Key technologies and tools: MySQL, PHP, Angular, HTML, CSS, JavaScript, jQuery, Qooxdoo

EDUCATION

Postgraduate Degree in Full-Stack JavaScript with AI

Rocketseat

2025 to 2026

Bachelor's Degree in Computer Engineering

UNOPAR (Universidade Norte do Paraná)

2013 to 2017

LANGUAGES

Portuguese: Native

English: Advanced
